Petition For Rule Making

I, Charles Leonard Hunt , WA6LYL, hereby respectfully submit my request to the Federal Communications Commissions to not take action on this Petition For Rule Making, RM-7869, as submitted by the American Radio League.

i oppose this action for many reasons. First, it appalls me that the ARRL seeks the help of the FCC for matters that are best resolved by local coordination efforts. They say that the weak signal people require a protected segemnt of the band, but at the expense of losing seventeen repeaters in Southern California if this propasal is adopted ! First Off, the weak signal people who complain have Not attended recent band plan mettings. They have decided that political pressure placed on ARRL to seek their needs were necessary, whithout consulting the regional coordination council. Involvement by the FCC Again in the 220 band is frankly by this author as malspropos, and a blow to the Amateur community by causing conflict of Hams against Hams. The ARRL is Playing a risky game by creating indignation between the FM community, and the ARRL for not following it's guidelines for band plans as indicated in their repeater directory.

Please do NOT accept this proposal, and instead yield the matter back to the local coordinatuon councils.

I have been told that the local council here in Southern California has tried to talk to the weak signal people responsible for this petition, but they ignore our appeal to resolve this without commission involvement.

PLEASE allow us the dignity we deserve, and grant us the opportunity to resolve our own problems without government intervention.

Respectfully Submitted,
December 22, 1991
